

**JOINT TRANSNATIONAL CALL 2016:****"Minimally and non-invasive methods for early detection and/or progression of cancer"****PARTNER REQUEST/COLLABORATION OFFER**

If you would like to have your profile published on the TRANSCAN-2 website, "Looking for a research partner" webpage, please fill out this form and send it to

If you have any questions about this form, please do not hesitate to contact us at

**Note:** Fields marked with a \* are mandatory

Contact Information	
First name *	Klaus
Last name *	Metzeler
Position *	Attending physician / research group leader
Telephone number	+49 89 4400 73037
E-mail address*	<a href="mailto:Klaus.metzeler@med.uni-muenchen.de">Klaus.metzeler@med.uni-muenchen.de</a>
Website address	English: <a href="http://www.sfb1243.biologie.uni-muenchen.de/forschung/a06-metzeler/index.html">http://www.sfb1243.biologie.uni-muenchen.de/forschung/a06-metzeler/index.html</a> German: <a href="http://www.klinikum.uni-muenchen.de/Medizinische-Klinik-und-Poliklinik-III/de/forschung/translational_leukemia_genetics/index.html">http://www.klinikum.uni-muenchen.de/Medizinische-Klinik-und-Poliklinik-III/de/forschung/translational_leukemia_genetics/index.html</a>
Institution/Organisation *	University of Munich
Department*	Laboratory for Leukemia Diagnostics & research group "Translational Leukemia Genetics" Dept. of Internal Medicine III
Street	Marchioninstr. 15
Postal Code / City *	81377 München
Country *	Germany

**\*I agree with the publication of my contact data and of this form on the TRANSCAN-2 Website:**

YES

## OFFER FOR COLLABORATION

IF YOU PROPOSE YOURSELF AS A PARTNER IN A CONSORTIUM, PLEASE DETAIL YOUR EXPERTISE

Short description of the areas of interest and expertise (Max. 2000 words):

### Areas of Interest:

Translational cancer genetics esp. in the field of myeloid neoplasia

Clonal heterogeneity and clonal evolution in cancer and its relevance to therapy response

Evaluation of novel prognostic and predictive biomarkers

Blood-based biomarkers for detection of measurable residual disease, including ctDNA for disease monitoring

### Expertise / Assets:

Translational and clinical research in myeloid neoplasia

Genetic analyses using various next-generation sequencing platforms, including deep targeted sequencing on large patient cohorts

Bioinformatics and biostatistics for translational research questions

Access to well-characterized cohorts of patients with haematological disorders, both for retrospective and prospective analyses
